Visualizing and Predicting Heart Diseases with an Interactive Dash Board

Proposed solution

1. **Problem Statement** :

   Wrong prediction and analysis of heart disease.

2. **Idea/Solution Description :**

   Re-check and analyze the data in the app to provide appropriate prediction results.

3. **Novelty/Uniqueness :**

   The data provided in the app is 100% doctor certified.

4. **Social Impact/ Customer Satisfaction :**

   Because of the appropriate and certified results the customers detect and cure the heart diseases before-hand.

5. **Business Model(Financial Benefit) :**

   Earlier when the problem was not solved, the app was not liked by customers. It didn't have that much reach .After solving the issue the app has reached great heights and grew financially.

6. **Scalability of the solution :**

   Inspite of new heart diseases being found in the future, it gives basic prediction which is more accurate and dependable.
